

INSPIRING GLOBAL CHANGE SINCE 1222

---

SCHOOL OF MEDICINE

# MEDICINE AND SURGERY

The Master's degree has an experimental profile: it focuses on tools and teaching contents of basic disciplines and is characterised by a strong scientific value. Moreover, it provides an early interaction with the clinic, through lessons and joint activities, in order to quickly achieve basic concepts in the context of the health-disease binomial. The programme pays also particular attention to the communicative-behavioural and bioethical fields, as well as the principles of health management and global health.

UNIVERSITÀ  
DEGLI STUDI  
DI PADOVA
