

INSPIRING GLOBAL CHANGE SINCE 1222

---

SCHOOL OF AGRICULTURAL SCIENCES AND VETERINARY MEDICINE

# FOREST SCIENCES

The Master's degree offers a comprehensive, innovative, and international perspective on forest and natural resource management and conservation. The programme provides a thorough understanding of forest ecosystem functioning, skills for sustainable and responsible management of forests and rural landscapes, and the ability to interpret complex socio-ecological systems. It also equips students with the capacity to identify innovative solutions for environmental management, addressing major local and global environmental challenges.
