

INSPIRING GLOBAL CHANGE SINCE 1222

SCHOOL OF ENGINEERING

INFORMATION ENGINEERING

The Bachelor's degree, distinguished by a methodological and multidisciplinary training approach, provides in-depth training in both the physical/mathematical fundamentals and in the disciplines characterising information engineering: control systems, electronics, telecommunications and computer science.

At first, the programme offers fundamental and cross-cutting theoretical course units. As students progress, specialising course units, including high-tech equipped laboratories, can be chosen within a large list, to create personal, focalised or broad-spectrum training.
